

Building The Climate Movement

Are you concerned, upset, or at a loss about Climate Change?

Don't give up. A rising surge of people here in the Pacific Northwest and around the globe are taking action!!

There is plenty to do... and there are great people coming together to make the transformative changes we need.

We're workers and students, business owners and union members, parents, grandparents, your neighbors and friends. We come from a variety of backgrounds and all experience levels.

We've got a tough, urgent situation on our hands. That's why we're rolling up our sleeves and working together to meet this challenge.

350PDX is the local chapter of 350.org, a grassroots movement active around the globe!

350pdx.org • (503) 281-1485 • info@350pdx.org

We want your involvement!

350PDX has different teams working on specific aspects of organizing a focused and coherent climate change movement.

Communications

develops and maintains the website, social media, produces promotional materials, publishes the newsletter, researching and writing articles, doing photography, video and audio coverage of 350pdx and other local climate related news and events.

Outreach

organizes tabling at various events, gathers petition signatures, gives presentations at high schools, colleges and local organizations, inspires new volunteers and gives trainings.

Divestment

persuades government entities, foundations, colleges and universities to divest their endowments, pension funds and other investments from fossil fuel stocks and bonds.

Fossil Fuels

disrupt business as usual for the fossil fuel industry with protests, rallies, and civil disobedience; work on local policy and educational outreach.

Arts and Events

sees the arts and related events, with a focus on relational experiences, community-building, fun and creativity, as a way to invite a broader spectrum of participants, and a more joyful kind of activism.

Neighborhood Teams

work together on local & regional issues in alignment with 350pdx.org goals of grass roots organizing, divestment and keeping at least 80% of fossil fuels in the ground.
