

WE CAN REVERSE CLIMATE CHANGE

Introducing Project Drawdown, the most comprehensive plan ever proposed to reverse global warming by 2050.

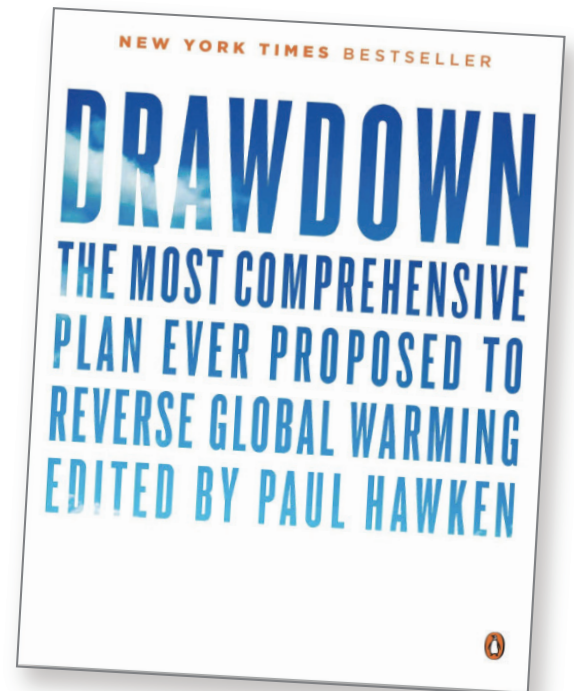

WEDNESDAY, APRIL 29 · 7 PM
Via Zoom Presentation

On April 29 at 7 pm the NE 350PDX Team will host a Zoom presentation by Pachamama Alliance Portland introducing Project Drawdown's upbeat, game-changing compendium of ways to reverse global warming. The session will include oral presentations, slides, video clips, music and breakout sessions. It will focus on the information presented in Paul Hawken's monumental best-selling work, Drawdown, The Most Comprehensive Plan Ever Proposed to Reverse Global Warming, which presents 80 individual well researched methods by which the climate crisis can be brought to heel, if they are scaled up on individual, neighborhood, town, state and national levels.

To become an audience member, one needs to download the Zoom app (easily done by going to <https://zoom.us/download> prior to the session). We also need an RSVP from you in order to send you a password - an unfortunate but easy step necessary to prevent Zoombombers from interrupting the session. Send RSVP to Mogsaway@yahoo.com with "Drawdown" in the subject line.

Hope to "see" you there !"
